

Biodiversity is next for green bond expansion

By the Nikko AM Green Bond Team
1 November 2023

Climate change is not the only environmental threat to how we live, work and interact with our planet. Our economic system is based on a model of take, make and waste that consistently over-utilises and fails to replenish Earth’s valuable, but dwindling resources. This is best depicted by Earth Overshoot Day, the annual date when humanity’s demand for ecological resources and services exceeds what Earth can regenerate in that year.¹ In 2023, this fell on 2 August and has been occurring earlier each year.

Figure 1 – Progression of Earth Overshoot Day 1971 – 2023

More than just birds and bees...

¹ <https://overshoot.footprintnetwork.org/about/>

The plight of bees is often used to illustrate the need to better preserve nature. As nature's pollinators, bees are a vital part of our food value chain. But their numbers are plummeting as their natural habitat is lost. Yet, biodiversity is about so much more than just bees and birds, it covers all of the planet's ecosystems, flora and fauna. And each of these components is at risk. More than a million species currently face extinction; since 1970, the wildlife population has declined by 69%.² Deforestation is another pressing issue – 10 million hectares of forest were lost between 2015-2020.³

Nature is also a massive contributor to economic growth. According to PWC, more than half (55%) of the world's gross domestic product (GDP) – equivalent to an estimated USD 58 trillion – is moderately or highly dependent on nature.⁴ And the deterioration of natural ecosystems could have far-reaching implications that are often not favoured in business risk analysis at present.

A new direction for green bonds

The need to transform how we interact with nature creates a major opportunity for the green bond universe. So far, issuers have successfully embraced funding the transition toward carbon neutrality, but far fewer are looking at regenerative biodiversity projects or initiatives that seek to protect our ecosystems from loss.

As awareness of the biodiversity threat grows, demand will rise from asset owners, especially ESG fixed income strategies that are not exclusively focused on the net zero transition, and also through evolving regulation – the same forces that first built momentum for climate-related green bonds.

At this early stage, the biodiversity theme could prove profitable as high demand and limited supply will drive up the greenium⁵ of these investments. Furthermore, as fixed income risk mitigation strategies factor in the threat to biodiversity, investors will increasingly seek to avoid those companies that threaten biodiversity or heavily rely on nature in their value chains without implementing replenishment strategies.

Investing in new research models

As biodiversity is still a new investment research field, and spans such a multitude of aspects, it could be preferable to approach the topic from different angles. Firstly, companies can be categorised into three different groups:

- 1) Companies whose activities directly impact biodiversity (i.e., oil & gas, transportation and mining);
- 2) Companies whose activities depend on biodiversity (i.e., utilities, consumer goods and forest products)
- 3) Companies that try to improve biodiversity – this group does not necessarily relate to specific sectors but considers the extent to which companies embed an intrinsic motivation to protect and nurture biodiversity within their business strategies.

Following this categorisation, measuring impact and dependency is the next logical step.

Ratings and research agency S&P presents one way to measure impact/dependency by providing an ecosystem footprint of its proprietary Nature & Biodiversity risk dataset. In its calculations, S&P combines three areas: it measures how land is impacted; ecosystem degradation; and the significance of location-specific ecosystem impacts. According to S&P's database, consumer staples and utilities have the greatest ecosystem footprint (Figure 2).

In such an emerging area of analysis, any methodologies to assess impact/dependency are only as good as their underlying data. Several new initiatives aim to promote voluntary disclosure standards that factor in biodiversity-sensitive areas as well as all scopes of carbon emissions. So far, the most promising effort has come from the EU, but clearly much work needs to be done in achieving greater transparency in this area.

Meanwhile, detailed commitment from the corporate sector to protect biodiversity is currently lacking. As we have already seen with net zero efforts, only time will tell whether companies voluntarily come forward with biodiversity commitments and action, or if a regulatory push will be needed. In the meantime, investors can play a greater role through engagement initiatives like Nature Action 100 (NA100).⁶ In October, we were honoured to join NA100’s growing coalition of investors requesting that companies adopt a more radical approach to reduce their reliance on plastics.

As for the asset management industry, we have already seen how successfully it can lead action on climate change and mobilise both investors and companies to engage with this topic. Moving forward, asset managers will have to fine-tune their research efforts relating to the protection of biodiversity, build up reliable databases and support companies with capital by funding genuine projects that seek to restore and replenish our natural world. Singapore: This document is for information to institutional investors as defined in the Securities and Futures Act (Chapter 289), and intermediaries only. Nikko Asset Management Asia Limited (Co. Reg. No. 198202562H) is regulated by the Monetary Authority of Singapore.

Hong Kong: This document is for information to professional investors as defined in the Securities and Futures Ordinance, and intermediaries only. The contents of this document have not been reviewed by the Securities and Futures Commission or any regulatory authority in Hong Kong. Nikko Asset Management Hong Kong Limited is a licensed corporation in Hong Kong.

New Zealand: This document is issued in New Zealand by Nikko Asset Management New Zealand Limited (Company No. 606057, FSP22562). It is for the use of wholesale clients, researchers, licensed financial advisers and their authorised representatives only.

Kingdom of Bahrain: The document has not been approved by the Central Bank of Bahrain which takes no responsibility for its contents. No offer to the public to purchase the Strategy will be made in the Kingdom of Bahrain and this document is intended to be read by the addressee only and must not be passed to, issued to, or shown to the public generally.

Kuwait: This document is not for general circulation to the public in Kuwait. The Strategy has not been licensed for offering in Kuwait by the Kuwaiti Capital Markets Authority or any other relevant Kuwaiti government agency. The offering of the Strategy in Kuwait on the basis a private placement or public offering is, therefore, restricted in accordance with Decree Law No. 7 of 2010 and the bylaws thereto (as amended). No private or public offering of the Strategy is being made in Kuwait, and no agreement relating to the sale of the Strategy will be concluded in Kuwait. No marketing or solicitation or inducement activities are being used to offer or market the Strategy in Kuwait.

Kingdom of Saudi Arabia: This document is communicated by Nikko Asset Management Europe Ltd (Nikko AME), which is authorised and regulated by the Financial Services and Markets Act 2000 (as amended) (FSMA) and the rules of the Financial Conduct Authority (the FCA) in the United Kingdom (the FCA Rules). This document should not be reproduced, redistributed, or sent directly or indirectly to any other party or published in full or in part for any purpose whatsoever without a prior written permission from Nikko AME.

This document does not constitute investment advice or a personal recommendation and does not consider in any way the suitability or appropriateness of the subject matter for the individual circumstances of any recipient. In providing a person with this document, Nikko AME is not treating that person as a client for the purposes of the FCA Rules other than those relating to financial promotion and that person will not therefore benefit from any protections that would be available to such clients.

Nikko AME and its associates and/or its or their officers, directors or employees may have or have had positions or material interests, may at any time make purchases and/or sales as principal or agent, may provide or have provided corporate finance services to issuers or may provide or have provided significant advice or investment services in any investments referred to in this document or in related investments. Relevant confidential information, if any, known within any company in the Nikko AM group or Sumitomo Mitsui Trust Holdings group and not available to Nikko AME because of regulations or internal procedure is not reflected in this document. The investments mentioned in this document may not be eligible for sale in some states or countries, and they may not be suitable for all types of investors.

Oman: The information contained in this document neither constitutes a public offer of securities in the Sultanate of Oman as contemplated by the Commercial companies law of Oman (Royal decree 4/74) or the Capital Markets Law of Oman (Royal Decree 80/98, nor does it constitute an offer to sell, or the solicitation of any offer to buy non-Omani securities in the Sultanate of Oman as contemplated by Article 139 of the Executive Regulations to the Capital Market law (issued by Decision No. 1/2009). This document is not intended to lead to the conclusion of any contract of whatsoever nature within the territory of the Sultanate of Oman.

Qatar (excluding QFC): The Strategies are only being offered to a limited number of investors who are willing and able to conduct an independent investigation of the risks involved in an investment in such Strategies. The document does not constitute an offer to the public and should not be reproduced, redistributed, or sent directly or indirectly to any other party or published in full or in part for any purpose whatsoever without a prior written permission from Nikko Asset Management Europe Ltd (Nikko AME). No transaction will be concluded in your jurisdiction and any inquiries regarding the Strategies should be made to Nikko AME.

United Arab Emirates (excluding DIFC): This document and the information contained herein, do not constitute, and is not intended to constitute, a public offer of securities in the United Arab Emirates and accordingly should not be construed as such. The Strategy is only being offered to a limited number of investors in the UAE who are (a) willing and able to conduct an independent investigation of the risks involved in an investment in such Strategy, and (b) upon their specific request.

The Strategy has not been approved by or licensed or registered with the UAE Central Bank, the Securities and Commodities Authority or any other relevant licensing authorities or governmental agencies in the UAE. This document is for the use of the named addressee only and

should not be given or shown to any other person (other than employees, agents or consultants in connection with the addressee's consideration thereof).

No transaction will be concluded in the UAE and any inquiries regarding the Strategy should be made to Nikko Asset Management Europe Ltd.

Republic of Korea: This document is being provided for general information purposes only, and shall not, and under no circumstances is, to be construed as, an offering of financial investment products or services. Nikko AM is not making any representation with respect to the eligibility of any person to acquire any financial investment product or service. The offering and sale of any financial investment product is subject to the applicable regulations of the Republic of Korea. Any interests in a fund or collective investment scheme shall be sold after such fund is registered under the private placement registration regime in accordance with the applicable regulations of the Republic of Korea, and the offering of such registered fund shall be conducted only through a locally licensed distributor.
